Important Safety Information | Prescribing Information

The first FDA-approved SSA for the severe diarrhea and flushing associated with metastatic carcinoid tumors*

CONTINUED COMMITMENT, COMPREHENSIVE SUPPORT

SSA, somatostatin analogue.

MAP: Providing injections at a time and place convenient for your patients

Mobile Administration Program

This program offers administration of Sandostatin® LAR Depot (octreotide acetate for injectable suspension) by a registered nurse at a time and place convenient for patients, so your eligible patients* continue to receive the right prescribed dose at the right time.†

For more information, call 1-800-282-7630 or download the enrollment form at www.sandostatin-patient-resources.com.

*Limitations apply. Available only for patients with commercial insurance. Program not available for patients with Medicare, Medicaid, or any other federal or state program. Program not available for residents of Massachusetts, Michigan, Minnesota, or Rhode Island.

† The program does not replace your care or the authority of the prescribing physician. Patients still keep their regular, scheduled physician checkups. First dose must be administered by prescribing physician.

Novartis offers additional support for you and your patients

RealSupport™: Real Information from real patients

The RealSupport™ program was developed to provide support and information to people who are receiving, or may be appropriate candidates for, Sandostatin LAR Depot. This program does not replace the information provided by health care professionals. It offers additional information from health care experts and other people who are receiving Sandostatin LAR Depot. To enroll, your patients can visit www.joinrealsupport.com.

Sandostatin LAR Depot Co-Pay Card

At Novartis Oncology, we've made it easier for patients to access co-pay assistance on their prescription costs for almost all Novartis Oncology products. Patients may be eligible for immediate co-pay savings on their next prescription:

- Commercially insured patients pay \$25 per month
- Novartis will pay the remaining co-pay, up to \$15,000 per calendar year

Limitations apply. Offer is not valid under Medicare, Medicaid, or any other federal or state program. Novartis reserves the right to rescind, revoke, or amend this program without notice. Encourage your patients to find out if they are eligible to enroll in the Universal Co-Pay Program by visiting www.CoPay.NovartisOncology.com or calling 1-877-577-7756.

Terms and Conditions: This offer is valid only for those with commercial insurance. Offer not valid under Medicare, Medicaid, or any other federal or state program. Not valid for cash payments, where product is not covered by patient's commercial insurance, or where plan reimburses you for entire cost of your prescription drug. Offer is not valid where prohibited by law. Valid only in the United States and Puerto Rico. This program is not health insurance. Offer may not be combined with any other rebate, coupon, or offer. The card is the property of Novartis Pharmaceuticals Corporation and must be returned upon request. Novartis reserves the right to rescind, revoke, or amend the program without notice. Patient certifies responsibility for complying with applicable limitations, if any, of any commercial insurance and reporting receipt of program rewards, if necessary, to any commercial insurer. This offer expires on December 31, 2017. Additional Terms and Conditions may apply.

Patient Assistance Now Oncology

Novartis Oncology shares your commitment to helping patients receive the medicines prescribed. Patient Assistance Now Oncology (PANO) provides access to information and our wide range of resources available to your patients in over 160 languages.

Support for patients Includes:

- Insurance benefits verification, including information on denials/appeals
- Information about financial assistance that may be available
- Patient Support Counselors who are able to provide information in over 160 languages
- One dedicated case manager/single point of contact per case

To learn more, call 1-800-282-7630.

INDICATIONS AND USAGE

Sandostatin® LAR Depot (octreotide acetate for injectable suspension) is indicated for long-term treatment of the severe diarrhea and flushing episodes associated with metastatic carcinoid tumors and long-term treatment of the profuse watery diarrhea associated with VIP-secreting tumors in patients in whom initial treatment with immediate release Sandostatin® (octreotide acetate) Injection has been shown to be effective and tolerated. In patients with carcinoid syndrome and VIPomas, the effect of Sandostatin Injection and Sandostatin LAR Depot on tumor size, rate of growth and development of metastases has not been determined.

IMPORTANT SAFETY INFORMATION

Warnings and Precautions:

- Gallbladder abnormalities may occur: Patients should be monitored periodically.
- Glucose Metabolism: Hypoglycemia or hyperglycemia may occur. Blood glucose levels should be monitored when Sandostatin LAR Depot treatment is initiated or when the dose is altered. Antidiabetic treatment should be adjusted accordingly.
- Thyroid Function: Hypothyroidism may occur. Baseline and periodic assessment of thyroid function (TSH, total and/or free T4) is recommended.
- Cardiac Function: Bradycardia, arrhythmia, conduction abnormalities, and other EKG changes may occur. The relationship of these events to octreotide acetate is not established because many of these patients have underlying cardiac disease. Use with caution in at-risk patients.
- Nutrition: Octreotide may alter absorption of dietary fats. Monitoring of vitamin B₁₂ levels is recommended during therapy with Sandostatin LAR Depot. Patients on total parenteral nutrition (TPN) and octreotide should have periodic monitoring of zinc levels.

Drug Interactions: The following drugs require monitoring and possible dose adjustment when used with Sandostatin LAR Depot: cyclosporine, insulin, oral hypoglycemic agents, beta-blockers, and bromocriptine. Octreotide has been associated with alterations in nutrient absorption, so it may have an effect on absorption of orally administered drugs. Drugs mainly metabolized by CYP3A4 and which have a low therapeutic index should be used with caution.

Adverse Reactions: The most common adverse reactions occurring in patients receiving Sandostatin LAR Depot were biliary abnormalities (62%), injection site pain (20-50%), nausea (24-41%), abdominal pain (10-35%), fatigue (8-32%), headache (16-30%), hyperglycemia (27%), back pain (8-27%), constipation or vomiting (15-21%), dizziness (18-20%), sinus bradycardia (19%), pruritus (18%), URTI (10-18%), myalgia (4-18%), flatulence (9-16%), arthropathy (8-15%), rash (15%), generalized pain (4-15%), sinusitis (5-12%), conduction abnormalities (9%), hypoglycemia (4%), and arrhythmia (3%).
